Import Data using Transform Maps (Spreadsheet) — ServiceNow

SCENARIO

A ServiceNow administrator / HR data user needs to import employee information from an Excel spreadsheet into ServiceNow, ensure that the data is correctly mapped and transformed, prevent duplicate records during repeated imports, and monitor employee information through reports and dashboards.

ENTICE STEP 1	Prepare Employee Data
INTERACTIONS	Create spreadsheet → enter structured employee data → download Excel file
THINGS	Google Spreadsheet; Excel file
PEOPLE	ServiceNow administrator / HR data user
GOALS & MOTIVATIONS	Prepare clean, structured data ready for import.
POSITIVE MOMENTS	Data is organized and ready for ServiceNow.
NEGATIVE MOMENTS	Potential issue: incomplete or incorrectly structured spreadsheet data.
AREA OF OPPORTUNITY	How might we reduce errors before the import begins?

ENTER STEP 2	Create Employee Test Table
INTERACTIONS	Tables → Create New → configure form → add fields → save
THINGS	Employee Test table; Employee ID; Name; Email; Department; Location
PEOPLE	ServiceNow administrator
GOALS & MOTIVATIONS	Create the correct target structure for employee records.
POSITIVE MOMENTS	Target table and required fields are available.
NEGATIVE MOMENTS	Configuration requires multiple steps.
AREA OF OPPORTUNITY	How might we simplify target-table setup?

ENTER STEP 3	Create Import Set Table
INTERACTIONS	Load Data → create Employee Import table → submit
THINGS	Import Set; Employee Import
PEOPLE	ServiceNow administrator
GOALS & MOTIVATIONS	Create a staging area for spreadsheet data.
POSITIVE MOMENTS	Import table is created and ready.
NEGATIVE MOMENTS	Finding and configuring Load Data may require navigation.
AREA OF OPPORTUNITY	How might we make data loading easier to discover?

ENGAGE STEP 4	Create Transform Map
INTERACTIONS	Create map → select source/target → Auto Map / Mapping Assist → save
THINGS	Transform Map; Employee Import; Employee Test; Field Maps
PEOPLE	ServiceNow administrator
GOALS & MOTIVATIONS	Map source fields to the correct target fields.
POSITIVE MOMENTS	Fields can be mapped and the map reused.
NEGATIVE MOMENTS	Incorrect mappings can affect resulting records.
AREA OF OPPORTUNITY	How might we make field mapping more intuitive?

ENGAGE STEP 5	Transform & Validate
INTERACTIONS	Transform → check success → open Employee Test → review records
THINGS	Transform result; Employee Test records
PEOPLE	ServiceNow administrator
GOALS & MOTIVATIONS	Create target records and confirm the transformation succeeded.
POSITIVE MOMENTS	Records appear in the target table.
NEGATIVE MOMENTS	Validation requires reviewing the resulting records.
AREA OF OPPORTUNITY	How might we provide clearer transformation feedback?

EXIT STEP 6	Prevent Duplicates with Coalesce
INTERACTIONS	Open Transform Map → Field Maps → enable Coalesce → save
THINGS	Coalesce; Employee ID; Transform Map
PEOPLE	ServiceNow administrator / HR data user
GOALS & MOTIVATIONS	Update existing employees instead of creating duplicates.
POSITIVE MOMENTS	Existing records can be updated; new IDs can be inserted.
NEGATIVE MOMENTS	Coalesce must be explicitly configured.
AREA OF OPPORTUNITY	How might duplicate prevention be easier to configure?

EXTEND STEP 7	Import New & Updated Data
INTERACTIONS	Load Data → select file → submit → Transform → review Transform History
THINGS	Excel file; Transform History; inserted/updated/ignored records
PEOPLE	ServiceNow administrator / HR data user
GOALS & MOTIVATIONS	Process new and changed employee information efficiently.
POSITIVE MOMENTS	New records are inserted and existing records updated.
NEGATIVE MOMENTS	Results need to be interpreted from transformation history.
AREA OF OPPORTUNITY	How might import results be made immediately understandable?

EXTEND STEP 8	Reports & Dashboard
INTERACTIONS	Create reports → add to Employee Analytics Dashboard → configure access/widgets
THINGS	Department report; Location report; Employee List; Dashboard
PEOPLE	Administrator; HR users with access
GOALS & MOTIVATIONS	Monitor employee data from a centralized view.
POSITIVE MOMENTS	Reports and dashboard reduce manual analysis.
NEGATIVE MOMENTS	Multiple configuration steps are needed.
AREA OF OPPORTUNITY	How might the dashboard provide the clearest operational view?

OVERALL JOURNEY

PREPARE → CREATE TARGET TABLE → CREATE IMPORT SET → MAP → TRANSFORM → VALIDATE → COALESCE → UPDATE/INSERT → REPORT → DASHBOARD

Research basis: This map is derived from the supplied ServiceNow project document. The document describes the workflow and outcomes, but does not provide interview or observation data; therefore the positive/negative moments and opportunity statements are journey-map interpretations of the documented workflow.
